

Read Aloud Technologies

**Helping children to learn
and love to read!**

**STEM and
language learning, too!**

Smart eBooks read aloud on Fun eReader®

- The 2-6 page For Creative Minds section in the back of each book is designed to engage children in learning more about the underlying math or science concept found in the story.
- All books are developed from the ground up to introduce or supplement science or math. We were “STEM” before it was the buzzword of the day. We want our books to inspire curiosity. The top priority in manuscript selection is whether or not we envision a parent reading the book to a child in his or her lap? We call that our “cuddle factor,” which also makes the books great for using during language arts to introduce or supplement science or math.
- We aren’t scientists so we turn to those who are. All books are vetted for accuracy before going to print.
- Additional free online resources for each title include:
 - 25-40 pages of cross-curricular teaching activities (includes text-based questions and writing prompts);
 - three interactive 10 question multiple choice quizzes:
 - reading comprehension
 - For Creative Minds
 - math word problems
 - alignment to Common Core, NGSS, and state standards
 - reading levels by Lexile®, AR, and Fountas & Pinnell.
- Books are also available in hardcover, paperback, Spanish paperback, 24 in Spanish hardcover, and 22 in Chinese paperback.

Digital Features

Assistive reading technologies:

- Word highlighting
- Reading speed control
- Single-word read-aloud when tapped

Language selection on-the-fly

- Toggle between English, Spanish, & Chinese

Other fun features
